

Jesse Oh

Computational Engineering Student | Self-Taught Music Producer & Audio Engineer

Austin, TX / Los Angeles, CA • jso687@utexas.edu • + 1 (818) 480-2616

SKILLS

- **DAW/Studio:** Ableton Live, FL Studio, macOS proficiency (system navigation, basic diagnostics, troubleshooting)
- **Mixing & Signal Flow:** Gain staging, EQ, compression, routing, bussing, utility processing (mono/stereo control), basic understanding of recording workflows, mic/line signal flow, and clean tracking practices
- **Instruments/Plugins:** Guitar, Cello, Serum, Kontakt 7, SINE Player, LABS, Addictive Keys, Melodyne
- **Studio & Professional Skills:** Session communication, studio etiquette, and recording terminology; ability to multitask, work independently, and maintain professionalism in fast-paced environments; customer-service-driven
- **Operations & Collaboration Tools:** Google Workspace (Docs, Sheets, Drive)
- **Technical:** Python, C++, Java, SQL; Microsoft Office (Excel/PowerPoint)

MUSIC PRODUCTION & AUDIO ENGINEERING

Independent Music Producer | **Ableton Live**

- Engineered and produced original music across genres ranging from high-density EDM (Complextro) to Botanica-inspired orchestral-folk arrangements.
- Managed full session workflows including guitar recording (DI), MIDI programming, editing, comping, and mixing.
- Applied core mixing fundamentals using Ableton stock devices (EQ Eight, Glue Compressor, Utility, Multiband Dynamics), emphasizing gain staging, routing, and session clarity.
- Prepared organized, collaboration-ready sessions and stems for export, ensuring consistent levels and clean signal flow; created short-form visual content synced precisely to music.

PROFESSIONAL SERVICE & OPERATIONS

Elite Prep | *Administrative Intern*

06/2025 - 08/2025

- Managed office operations, answered program inquiries, and ensured high-standard facility maintenance.
- Communicated professionally with students, parents, and staff while managing multiple priorities, demonstrating initiative, discretion, and a strong customer-service mindset.
- Created Chrome Extension and scheduling automation engine (in free time), reducing manual administrative work by 95%.

Chipotle | *Line Worker*

01/2023 - 06/2023

- Simultaneously managed front-of-house service, digital order fulfillment, and back-of-house logistics (inventory prep and sanitation) to meet tight turnaround times.
- Maintained peak performance and focus in high-pressure, high-volume environments, delivering efficient service while adhering to strict organizational protocols.

PROFESSIONAL TECHNICAL EXPERIENCE

Cogniedge AI | *Software Engineering Intern*

09/2025 - Present

- Developing a computer vision safety system for Human-Robot Collaboration (HRC) using Mediapipe and OpenCV.
- Engineered a real-time posture estimation pipeline to calculate ergonomic safety scores from skeletal joint data.

Texas Rocket Engineering Lab | *Front-end Developer*

02/2024 - 10/2024

- Led the redesign of the website, resulting in a 20% increase in positive user engagement and optimized load performance.
- Translated high-fidelity Figma wireframes into responsive, accessible web interfaces using HTML, CSS, and JavaScript.

EDUCATION

University of Texas at Austin | **B.S. Computational Engineering**

College Scholar, UT Austin Honors | GPA: 3.82 | *Expected 2027*
